## Public Notification on Internet Leased Line Services (ILL)

The Internet has become an integral part of our everyday life and while access through mobile network internet is convenient when on move or browse internet for quick information or to communicate using social media platforms, the mobile internet is neither designed nor convenient for prolonged internet access for studies, entertainment or avail any G2C/G2B services as it is normally limited to amount of data downloaded.

Therefore, the Authority would like to encourage the general public to consider availing Internet leased line services with dedicated speed without data limitation services for reliability, scalability and affordability.

The costs incurred for the internet leased line connection are as follows:

| Sl.No. | Detail  | Cost in Nu  | Remarks   |
|--------|---|---|---|
| 1      | One Time Set up cost                          | Nu.2500/-   | The one time set up cost for the ILL connection inclusive of an outdoor unit, cables and other accessories                      |
| 2      | Cost of equipment (router/WI-FI access point) | Nu.1500 to Nu.5000  | Different choices depending on brand and quality. Such as DLINK, TPLINK, TENDA, Syrotech.                                       |
| 3      | Monthly cost for bandwidth subscription       | Nu. 550/Mbps/Month (BTL)<br>Nu 675/Mbps/Month (TICL)<br><br>Recommend subscription to at least 2 Mbps for better service. | Pl visit their websites<br><a href="http://www.bt.bt">www.bt.bt</a><br><a href="http://www.tashicell.com">www.tashicell.com</a> |

The customers can also avail the similar ILL services at competitive prices from other local Internet Service Providers (ISPs) such as Nano ([www.nano.bt](http://www.nano.bt)), SuperNet InfoComm, DrukCom ([www.drukcom.com](http://www.drukcom.com)), Nilo FiberNet ([www.nilofibernet.com](http://www.nilofibernet.com)), DataNet WiFi ([www.datanetwifi.com](http://www.datanetwifi.com)), Bitcom Systems and Gelephu Digital Network.
